Student Volunteer   *Mar 2019 - Jun 2021*

- Collaborated with the Biology teacher and Eco-Schools to develop and execute sustainable initiatives within the school community, which resulted in increased student engagement with environmental conservation efforts.

PROJECT EXPERIENCE

Front-end

Portfolio

- Developed a dynamic portfolio website with seamless user experience, combining HTML, CSS, and JavaScript for a visually stunning and interactive showcase of my skills and projects.

Back-end

invaders

- Programmed an open-source terminal arcade game in Rust, a modern twist on the classic Space Invaders, featuring immersive audio integration for a nostalgic yet innovative gaming experience.

Back-end

mapEditor

- Created a Java application serving as an intuitive map editor, utilizing the SimpleGraphics library for graphics and keyboard input.

Back-end

rust_to_mysql

- Built a command-line interface application in Rust, showcasing comprehensive CRUD operations on a MySQL database. Designed for practicality, this project offers a hands-on demonstration of efficient data management within a Rust environment
